---

Software engineer with fullstack experience: client and server side, requirements building, DB modeling and some devops.

I have a passion to learn and have a deep understanding of complicated stuff, and a sense of responsibility to not leave unfinished work.

I'm a people person and team player, like to learn new technologies and an independent learner.

## **Languages:**

Hebrew - native

English - very good

## **Tech stack:**

C#, angular, typescript, JavaScript, html, CSS, bootstrap, jQuery, C, assembly.

Basic knowledge in python, java, php.

## **Development platform:**

asp.net ,VS code ,vs 2019, iis, VMware,

Learning by myself react and mobiles app with Ionic and Android Studio and Xcode for ios

## **OS:**

Windows 10, Windows 7, windows server, Linux kali, ubuntu, Debian

## **DB:**

MS SQL SERVER, ACCESS

## **Cyber security:**

Penetration testing, windows hardening, web injection, Metasploit, cryptographic, Network management, cisco Server management

## **Work experience:**

### **currently:**

working on few projects like borrowing app and few more and in final progresses for my porto website. And building a cross platform mobile app for this website.

### **2021-2022:**

designed and Develop Porto website (<http://www.theporto.online>) and deploy on my server from scratch and I've using multiple tech like JSON,JWT,JQUERY,BOOTSTRAP,GIT,XML,http interceptor ,Postman,

**2020:** I've developed Notes app with WinForms

## **Education:**

The Markaz Chareidi Institute of Technology
